

## COMPANY PROFILE

The foundation in Galati in 1870, by the German company Strousberg, of the Romanian Railway Workshops, involved the occurrence of a factory, intended as supplier for necessary industrial equipment and spare parts.

From 1990 the company became MENAROM S.A., a joint stock company, whose activity is mainly focused on manufacturing of marine mechanical and electrical equipment, but also of technological equipment for various industrial applications.

In August 2007, **EURO – P.E.C. S.A.** Galati, a Romanian joint stock company, purchased the entire assets stake of MENAROM S.A. Galati, which is now an active member of this local group, under the name of **MENAROM P.E.C. S.A.**

Enjoying a rich experience of many years and due to its production facilities able to satisfy the most various technological requirements and with the human support of a skilled personnel, **MENAROM P.E.C.** proves the capability of the company to continuously improve the quality and diversity of its products for his partners, companies belonging both to E.U. (Holland, Norway, Germany, Greece, France etc.) and Romanian market (Damen Shipyard, STX Shipyards, ArcelorMittal and others).

## MAIN PRODUCT CATEGORIES

The production capability of **MENAROM P.E.C.** includes:

- **Mechanical equipment for various industrial processes**
- **Metal engineering and machining works**, including on CNC machines
- **Naval machinery**, such as: windlasses and mooring winches, capstans, rudders, derricks, davits, roller fairleads, etc.
- **Dragging and maneuvering equipment for harbour and onshore applications**
- **Steel structures**, medium and light
- **Sandblasting and painting works**
- **Electrical control stations and switchboards**
- **Starting resistors**
- **Industrial electromagnets**
- **Cable trays**

The above profile description is a non-restrictive range, being an extract from the company's offer, related to the products that are currently manufactured based on the orders of our major, regular clients.

**MENAROM P.E.C.** has the full capability and availability to act as sub-contractor or service provider for various other particular requests, based on customer's projects, within the following application range:

- machining and mechanical engineering works
- metallic constructions and light steel structures
- electrical engineering works

Mechanical equipment • Deck machinery • Winches • Capstans • Rudders • Cranes • Davits • Steel structures

## Quality Management and Inspection

The company has an ISO 9001:2008 QSM certification, granted by Germanischer Lloyd.

Also, ISO 14001:2004 and OHSAS 18001:2007 certifications came into force recently.

Its products are certified and accepted by the main classification societies, such as: Germanischer Lloyd, Bureau Veritas, Lloyd's Register, American Bureau of Shipping, Det Norske Veritas, etc.

**Equipment for industrial processes, based on clients' projects, for various applications, especially on metallurgical field, such as:**

- Gearboxes for terrestrial and naval industry
- Gears with cylindrical and bevel toothing
- Various roller tracks, conveyor and bucket systems
- Expanding mandrels
- "S" roller blocks and driving rollers
- Various types of tanks and containers

➤ Brief reference list of recent work of this kind performed in ArcelorMittal Galati steel plant:

- **Railway wagons dragging system** – in Heavy Plate Rolling Mill no. 2 (LTG-2)
- **Turning rollers system at marking installation** – in ArcelorMittal Tubular Products

**MENAROM P.E.C.** endowment consists in production sections and workshops able to perform all kinds of works for various products and items manufacturing.

The technical capacity is based on the following production facilities:

- **Design and engineering technology department**
- **Mechanical testing laboratories**
- **Steel constructions section**
- **Mechanical works section**
- **Hot metal works, by forging and heat treatments operations**
- **Machinery mounting section**
- **Electrical apparatus section**
- **Maintenance section**
- **Warehouses and storing platforms**

The company has the necessary logistics to provide the good operation and maintenance of his own equipment and machines and to perform various kinds of inspection tests for the products, in order to assure the full compliance with the clients' quality requirements.

## Partnerships and foreseen co-operations

**MENAROM P.E.C.** is an active member in the following professional associations :

- **ANCONAV**
- **FEPA - CM**

*The company aims to extend and develop its activity, by initiating long term collaboration with reliable partners.*

*Based on its high experience and technical expertise, the company is focused to establish win-win business relationships, with well motivated and interested partners.*
